| English | Laura Jean Baker, Samantha Looker, Vivian Foss, Domenic Bruni, Christine Roth, & Loren Baybrook | The Gift of Giving: Effective Assignments & Feedback: *Liaisons and adjuncts will share examples of formal writing assignments. What kinds of instructions and prompts work to elicit critical thinking, fluidity, and overall well-written submissions? Director of First-Year Writing Samantha Looker, along with liaisons, will discuss pedagogically sound ways of responding to student writing. As a group, adjuncts and liaisons will collaborate by responding to a sample of student writing.* | Reeve 221 |
| French - DFLL | Andrzej Dziedzic | French Phonetics and Pronunciation - From Theory to Practice: *Discuss a number of difficulties American students encounter when learning to pronounce French sounds correctly. Look at specific examples and do several phonetics exercises which CAPP teachers will be able to use in their classes.* | Reeve 207 |

| Math | Zoubir Benzaid & Kandasami Muthuvel | Introduction to LateX and Beamer: *Give background that will enable adjuncts to quickly typeset exams, lecture notes, homework and even short papers. Then explore the LateX Beamer package and learn how to use it to produce beautifully typeset presentations that are superior (for science and math) to those obtained using Microsoft PowerPoint.* | Swart Lab 229 |
| Math | Steve Winters | The Five-Cube Puzzle: *The Five-Cube Puzzle consists of five cubes whose faces are colored with one of five different colors. The object of the game is to stack the five cubes on top of one another so that each side of the stack has one face of each color. During this workshop, participants will investigate different techniques for solving this problem and variations of this problem.* | Reeve 215 |
| Music | Julia Chybowski | | AC N215 |
| Physics | Dennis Rioux | Developing Effective Demonstrations of Physical Phenomena & Sharing Course Content: *Participants will exchange information on demonstrations for classroom or laboratory use with an emphasis on clarity of phenomena, special techniques, and reliability. Brainstorm solutions to difficulties that have been encountered in the past or advice on developing a wish-list demonstration. Also, because the general physics curriculum allows for emphasis on a variety of topics, participants will share course content information including lab activities, expectations for homework, and testing practices.* | Halsey 360 |
