## Mainframe To Web Mapping

**Description** - The following list contains mainframe transactions that have been replaced by new CARES Worker Web pages. It also contains a table that displays the icon equivalent of PF keys and a brief description of the web function.

### Mainframe Transactions- Tran Codes

Almost all pages are in Application Entry. If the page is in Client Registration, that is noted in the Web Folder section. The Non-financial items column isn't all inclusive. The table also indicates if a page can't be accessed directly. Some clearance pages are only accessible when in the clearance driver flow.

### CARES Mainframe Equivalents- PF Keys

Not all of the PF keys translate into web icons. The most commonly used PF keys that have a web equivalent are below.

CARES PF Keys	Web Icon	Web Description
PF 1- System Help		System Help
PF 4- Go to the main menu. Saves data on the current screen.		The closest thing to PF 4 is the navigation menu.  Use the navigation menu on the right side of the page to go to a specific page.  If you try to go to a new page without having completed the current page, you'll get error messages, and you can't go to the requested page, until you resolve the edits. Then you can use the navigation menu to get to a new page.
PF 7- Previous page.		Goes to previous page in history.
PF8 - Next page.		Goes to the next page in

		history.
PF10- Cancel and Sign Out		Logs out of the system.
PF 12- Cancel and return to previous menu	Cancel <input type="checkbox"/>	<p>Click on the cancel key to cancel out of the page. It doesn't go to the previous menu. Instead it goes to the previously scheduled page. New data on the page you cancel from is not saved.</p> <p>You can also use the cancel button and choose a new page from the navigation menu.</p> <p>Reminder: If you wish to look at history, always click on the cancel button prior to entering your history criteria.</p>
PF 16- Save/Refresh		Adds a new record.
