

MSE Curriculum and Instruction

Omro Site-Based Program

Purpose of Program:

To help increase student learning in the classroom and school.

Program Format:

Unlike our traditional campus-based degree program, this program will be offered on site at Omro. It will be offered in a cohort format meaning students will progress throughout the program with the same groups of students. The group will determine the program format and emphasis area classes. It is anticipated most classes will be offered in a blended format of half face-to-face and half online (yes, you will need internet access). This is a 30 credit program.

Potential Program Coursework and Timeline:

When	Class (3 credits each)
Summer 2010	Elem Ed/Sec Ed 715-Curriculum and Professional Development Planning Reading 705-Reading in the Schools
