

Classes with a Lab, Lecture or Discussion

Some classes have more than one meeting pattern. Generally, these are science classes, where there is a lecture or discussion included (these are called components). It's important you understand how these components are linked together to avoid errors when registering. Typically, the enrollment section is the lab, and you are automatically enrolled in a lecture or discussion. Any classes that overlap can't be added to your schedule via Titan Web.

Below is an example of how to search for these identifiable keys. Note that each section begins with the prefix of "A"; select an "A" lab component and you are automatically enrolled in the "A" lecture component. The components are listed here.

Both sections are "A"
