

1. **True/False** Although Euclid states many propositions in the *Elements*, he proves very few of them.
2. **True/False** Euclid begins the **Elements** with definitions, postulates and common notions, then uses these in his propositions.
3. **True/False** Euclid was the first geometer to rely on mathematical proof.
4. **True/False** In talking about angles in Book I, Euclid commonly makes reference to “degrees.”
5. State one of Euclid’s axioms in your own words.
