## Tuberculosis Screening Report Form

Documentation of a TB skin test is required of all international students before being accepted as a student at the University of Wisconsin Oshkosh. Please take this form to your physician and have him/her administer a Mantoux PPD skin test and document the results below. The skin test must be read 48-72 hours after administration. Results must be recorded in millimeters of induration.

In addition please read and complete the back page of this form. We recommend a repeat TB skin test once you arrive on campus if you are from one of the listed high-risk countries.
