Starting Your Research

Six Steps for Doing Your Research

Step 1 *What are you looking for?*

- What is your topic sentence or research question?
 - Provides a starting point from which to draw search terms or keywords.
 - Helps you determine if your topic is too broad or too narrow.

Step 2 *What are your Search Terms?*

List the important concepts from your research statement.

- Are there any synonyms or related terms?
- Can any of the terms be both plural and singular?
- Do any of the terms have another meaning?

Step 3 *Do you have Limiters*

Limiters are special conditions that are required for the assignment

- Articles published in the last five years
- Peer Reviewed journals
- Research

Step 4 *Construct your Search*

Keyword Searching

- Keyword searching locates the term anywhere in the item's record
- The computer searches for the term as a string of characters
- What context the term is used becomes very important

Boolean Operator **AND** (*Narrows*)

- The most frequently used operator
- Looks for both terms in the record
- Makes the search results smaller

Boolean Operators **OR** (*Broadens*)

- Expands your search by locating either term in the record
- Useful for searching
 - Plurals
 - Synonyms
 - Related terms
 - Comparisons

Truncation

- The addition of symbol to the end of a root word to retrieve variant endings.
- Usually a? or *
- Find both the singular and plural form

Subject Headings and Descriptors

- More precise than keyword searching
- Is defined within the context of the database
 - Locate materials on the same topic
 - Eliminate duplicate search terms

Step 5 *Where to Start*

- **Where can I find background information?**
 - Print Reference
 - Gale Encyclopedia of Medicine
 - Electronic Reference
 - Oxford Reference Online
- **What Periodical Indexes included materials on my topic?**
 - General
 - Social Science Citation Index
 - Specific
 - Cinahl
 - Medline

Step 6 *Locating your Materials*

- Use **Find it** to locate Articles in electronic or print format
 - Request Articles not available at Polk Library using Interlibrary Loan
- Check **Worldcat** for Books, Videos and Government Documents
 - Request items not available at Polk Library using Universal Borrowing and Interlibrary Loan

ELECTRONIC RESOURCES

Electronic Resources

For a list of electronic resources specifically for Nursing go to
<http://www.uwosh.edu/library/subjects/nursing.html>

LIBRARY CATALOGS

Polk Online Catalog

The Online catalog contains the holdings for Polk Library including the main collection, government documents and the EMC.

WorldCat

WorldCat is a mega-library catalog containing more than 42 million records contributed by 15,000 libraries around the world. It contains full bibliographic descriptions and cataloging information for the following types of materials: books, serials, manuscripts, sound recordings, audiovisual materials, maps, music scores, and computer-readable files.

ELECTRONIC REFERENCE

Oxford Reference Online

Online versions of over 100 dictionaries, encyclopedias and reference books. Coverage of a broad range of subjects: from General Reference, Language and Quotations to Science and Medicine, and from Humanities and Social Sciences to Business and Professional.

Includes:

The Oxford Companion to the Body
Concise Medical Dictionary
An Oxford Companion to Medicine

A Dictionary of Nursing
A Dictionary of Psychology
An A-Z of Medicinal Drugs

PERIODICAL INDEXES

★CINAHL

Indexes articles, dissertations and media in the area of nursing and allied health. Contains some full-text.

Medline

Covers international journals published in all areas of medicine. Use in place of PubMed

Nursing Consult

Nursing Consult contains drug information, patient handouts, medical journals, health reference books, nursing news and clinical updates. **Nursing Consult is not included in the FIND IT function and does not cross reference its articles with other periodical indexes.**

American Journal of Infection Control

Disaster Management & Response

Geriatric Nursing

Heart & Lung

Journal of Emergency Nursing

Journal of PeriAnesthesia Nursing

Pain Management Nursing

Case Manager

Applied Nursing Research

Archives of Psychiatric Nursing

Journal of Vascular Nursing

Advances in Neonatal Care

Journal of Pediatric Health Care

Journal of Pediatric Nursing

Journal of Radiology Nursing

Newborn & Infant Nursing Reviews

Air Medical Journal

Journal of the Association of Nurses in AIDS Care

Seminars in Oncology Nursing

Journal of Midwifery & Women's Health

Nurse Leader

Nursing Clinics

Critical Care Nursing Clinics

MD Consult

MD Consult includes more than 40 leading medical books, full-text articles from over 70 journals, over 1,000 peer-reviewed clinical practice guidelines, more than 5,000 customizable patient education handouts, as well as drug information and Category 1 CME modules."

Health Source Nursing/Academic Edition

Indexes 500 periodicals and over 1000 pamphlets in the fields of nutrition and consumer health. Contains full-text with images

PsycINFO

Indexes information in the field of psychology.

Social Science Citation Index

Provides access to current bibliographic information and cited references, covering more than 1,700 of the world's leading social sciences journals in a broad range of disciplines.

Web access 1987- to present

ELECTRONIC RESOURCES

Advanced Keyword Searching

What is Keyword Searching?

Keyword searching is the most flexible type of search that can be done on an online catalog or index. Unlike a Subject Search, the term can appear anywhere the record, including the title, the author's name, subject heading or the name of the periodical or publisher. Keyword Searches can be as simple as a single word or very complex using boolean operators, searchable fields and nested searches.

Boolean Operators

A method of combining concepts in a keyword search, which allows the searcher to make use of three logical commands (operators).

AND Used to narrow the search result. Each time another concept is added using "and" the search becomes more specific
Caring and Philosophy

OR Used to expand or broaden the search results by including synonyms and related terms.
Caring or Empathy

NOT Used to exclude unwanted records for the search results.
Philosophy not Medical

Nested Search

When two different Boolean operators are used in the same search statement, parentheses must be included to indicate which command is to be performed first.

Philosophy and (Caring or Empathy)

Truncation

In database searching, the addition of a symbol (usually ? or *) to a root word to retrieve variant endings. Truncation can be used to retrieve both the singular and the plural forms of a word at the same time.

Philosoph?

Will locate Philosophy, Philosophies, or Philosophical

Descriptors/Subject Headings

A word or phrase assigned to a work to indicate its subject, and to serve as an access point in an index catalog or database. Many databases such as ERIC have their own list of subject headings called descriptors. These descriptors appear in the DE field of the record and can be used to find additional search terms

Searchable Fields

Search Terms can be limited to a particular field of the record. Most databases will allow terms to limited to the Title, Author or Subject field. Other terms may also limit to Publication Year, Language, Publication Type or Subset fields. For example in CINAHL

Limiting in subset to USA

Will limit citations to journals only published in the United States

Stopwords

Short words are terms that occur too frequently for the database to search them. Using one of these words usually results in no records being found. Each database uses its own stopword list.

Examples a, an, on, of, with, because

ELECTRONIC RESOURCES

Polk Library Catalog

Searching From the Main Page

Author Looks for books written by a particular author. Be sure to type last name then first name, (Shakespeare William) For books about an author, use subject heading searching as below.

Title/Journal Title Looks for an exact match of the words you type in. If unsure of a title, try typing just the first word or two. Use Journal Title when searching for journals or magazines.

Subject Heading Looks for Library of Congress Subject Headings (LCSH). If you don't know the "official" subject heading for your topic, try using a keyword search instead.

Keyword Looks for your term anywhere in the record. A great way to start searching for materials on your topic. The Polk Catalog offers two types of keyword searching.

Keyword Use for quick simple topic searches. Basic is similar to searching Internet search engines such as Alta Vista or Infoseek.

- > Use +in front of important terms
+internet+censorship
- > Place phrases in "quotes"
"gun control"

Advanced Keyword Is the most complex and flexible of the keyword searches. This option is similar to the keyword search in many periodical indexes. *Advance Search must be done from the Catalog page.*

- > Phrases MUST be in "quotes"
"gun control"

Set Limits

Search Limits allows you to limit search results to a variety of criteria, including publication year, language and location.

Limiting to common locations can be done from the Basic search screen other options are available using the Advance Search feature of the catalog

Use the Find Video search on the library homepage to locate videos by keyword or title.

Building a great library : the Coolidge years at Harvard /

Title:	Building a great library : the Coolidge years at Harvard / by William Bentinck-Smith.
Author:	Bentinck-Smith, William, 1914-
Publisher:	Cambridge, Mass. : Harvard University Library, 1976.
ISBN:	0674085787
Format:	Book
Subjects:	Coolidge, Archibald Cary, 1866-1928. Harvard University. Library--History.
Notes:	Includes index. Bibliographical footnotes.

Information needed to site this item

Click these to find other materials under this topic

Holdings Information

Database:	UW-Oshkosh
Location:	Books (A-E 2nd South, F-PN 2nd North, PQ-Z 3rd North)
Call Number:	Z733.H34 B4
Status:	Available

Locations

Books

Contains the majority of the Library's collection. Divided into three rooms A-E 2nd South, F-PN 2nd North and PQ-Z 3rd North. All items circulate.

Books Oversized

Contains larger books that do not fit on the regular shelving. Located in the same rooms as the Main Collection. All items circulate.

EMC (Educational Materials Collection)

Collection of educational resources located in 1st North. Most items circulate.

EMC Audio Visual

Library's video collection also located on 1st North. Most items circulate.

Leisure Reading

Located in a separate room on 2nd North. This collection contains popular books and magazines. Most items circulate.

Polk 101

Contains encyclopedias, dictionaries, and information on various subjects. Located on 1st South. Nothing circulates.

Government Information

A collection containing Federal, State and some International documents. Located on 3rd South. Most items circulate.

Archives/Closed Stacks/Special Collections

Located in Government Documents on 3rd South. Contains historical books, theses of UW-Oshkosh students and rare books. Nothing circulates and the collection is locked

Locating Reserves

Connect to Reserves from the Main Library Page

Find Course Reserves

- > [E-Reserves](#)
- > [Traditional Reserves \(print, video, etc.\)](#)

Traditional Reserve

Use the Course Reserve to locate material placed at the library for specific classes.

Select your instructor, department, class number, or section from one of the drop down menus and click search. A list of material will appear.

➤ To retrieve a list materials for just your class limit by instructor and course.

Electronic Reserves

A portion of the materials on reserve exist in an electronic format that can be viewed or printed directly from the computer

1. Select the EReserve link from the Library Home
 2. Select Electronic Reserves and Reserve pages
 3. Select you instructor name from the drop down list and click go.
 4. Select your course
 5. A short statement on copyright will appear click accept.
 6. A list of your reserve items will appear click on the one you wish to view.
- You will need Adobe Acrobat to view the eReserve items that are in the PDF format. The program can be download from the link on the University's home page.

ELECTRONIC RESOURCES

CINAHL via Ebsco

CINAHL, The Cumulative Index to Nursing & Allied Health Literature, contains abstracts and some full-text articles covering the years 1962 to present. Along with journal articles, CINAHL indexes nursing dissertations, educational software, and audiovisual materials.

Getting Started

1. Locate Articles by Subject on the main library page
2. Select Nursing from the Drop down menu.
3. Click CINAHL
4. CINAHL will open at a search screen

Limiting your Results

When you perform a search, Cinahl produces a list of the ten most common subject headings found in your result list. These terms can be used to narrow and expand your search results.

- If one of your search terms appears in the list click it. It will remove articles that include the word, but do not really discuss the topic.
- Check to see if Cinahl provides an alternative term to any of your search terms (Ex hypertension for high blood pressure) This will usually locate more materials on your topic.
- Use the list as a quick way to cut down large results by selecting additional search terms.

Do a quick limit by Age Group, Gender or Publication Type

Use for a quick limit by date or click the Show More to limit by language, research and peer reviewed articles or to remove Dissertations.

NOTE: using the Full Text will remove full text articles available in other electronic resources available from Polk Library

Experiences of exclusion when living on a ventilator: reflections based on the application of Julia Kristeva's philosophy to caring science.

Authors: Lindahl B

Affiliation: Senior Lecturer RNT, University of Gothenburg, Sahlgrenska Academy, the Institute of Health and Caring Sciences, Gothenburg, Sweden

Source: Nursing Philosophy (NURS PHILOS), 2011 Jan; 12(1): 12-21 (39 ref)

Publication Type: Journal article - research

Language: English

Major Subjects: Ventilator Patients -- Psychosocial Factors
Respiration, Artificial -- Psychosocial Factors
Philosophy, Nursing
Home Oxygen Therapy
Caring
Nursing Care

Minor Subjects: Human; Narratives; Phenomenological Research; Sweden; Interviews; Male; Female; Communication; Interpersonal Relations; Oxygen Delivery Devices; Life Experiences; Nurse-Patient Relations

Abstract: The research presented in this work represents reflections in the light of Julia Kristeva's **philosophy** concerning empirical data drawn from research describing the everyday life of people dependent on ventilators. It also presents a qualitative and narrative methodological approach from a person-centred perspective. Most research on home ventilator treatment is biomedical. There are a few published studies describing the situation of people living at home on a ventilator but no previous publications have used the thoughts in Kristeva's **philosophy** applied to this topic from a caring perspective. The paper also addresses what a life at home on a ventilator may be like and will hopefully add some new aspects to the discussion of philosophical issues in nursing and the very essence of care. Kristeva's **philosophy** embraces phenomena such as language, abjection, body, and love, allowing her writings to make a fruitful contribution to nursing **philosophy** in that they strengthen, expand, and deepen a **caring** perspective. Moreover, her writings about revolt having the power to create hope add an interesting aspect to the work of earlier philosophers and nursing theorists.

Abstract: Angiotensin receptor blockers (ARBs) are antihypertensive agents associated with reduced risk of new-onset diabetes mellitus. The ARB telmisartan is a partial agonist of peroxisome proliferator-activated receptor-gamma (PPAR-gamma). This study evaluated the effect of telmisartan on insulin resistance, a known target of PPAR-gamma agonism. Overweight/obese persons with body mass index ≥ 28 kg/m², waist circumference ≥ 35 inches, and components of the metabolic syndrome without hypertension or diabetes who were not preselected for insulin resistance were enrolled. Patients were randomized to telmisartan or matching placebo for 16 weeks. The primary efficacy measure was change from baseline in the insulin sensitivity index (SI), calculated from oral glucose tolerance testing. SI was also evaluated in a subset of patients using a hyperinsulinemic euglycemic clamp. Secondary end points included measures of insulin sensitivity and glucose and lipid metabolism. A total of 138 patients were randomized and received ≥ 1 dose of study medication; 128 completed the study. At end point, no significant difference was found between telmisartan and placebo groups regarding change from baseline in SI or in glucose area under the curve. No significant between-group differences were found regarding glucose metabolism or lipoprotein levels. In the population with abdominal obesity and components of the metabolic syndrome, telmisartan did not increase insulin sensitivity. (© 2010 Wiley Periodicals, Inc.)

The abstract provides a quick overview of the article

PRINTING

EBSCO allows you to place citations and articles in a folder for printing, emailing or saving to disk. Full Page Images should be printed separately.

1. Click the folder icon at the top of the screen
2. At the next page EBSCO will allow you Print, email or save you item to a disk. Select Print
3. At the next page click Print.
4. EBSCO will format your materials for printing
5. Use your browser's print function to print the results.

PUTTING IT TOGETHER

Using the Get Full Text

What is Get Full Text?

Get Full Text is a service available with Polk Library's periodical indexes which allows you to determine:

- ❖ If an article is available full-text from another periodical index
- ❖ If Polk Library owns a print copy of the journal the article appeared in.

Items not available at Polk Library can be request through the Interlibrary Loan (ILL) Department. See page _ for more details. The Find It option will input all relevant information into the ILL form for you. ***This option appears only when the item is not available from an online source.***

PUTTING IT TOGETHER

Locating Materials from a Bibliography

Utilizing a useful article's bibliography or references list can be a very efficient way to locate more materials on your research topic.

To Start

Determine if the item is an article, book or book article. Depending on the type of material, you will use different strategies to locate it.

The examples below will help you determine what you are looking for and how to locate it.

Journal Article

Smith, S., Boone, R., & Higgins, K. (1998). Expanding the writing process on the web. *Teaching Exceptional Children*, 30(5), 22-27.

- To find your article you will first need to determine if Polk Library has access to the journal in which your article was published in either an online or print format.
- The Journal name is usually in Italics followed by a volume and page number
- Use the "Know the name of a specific journal and want to know if we get it?" search located on the Polk Library home page.
- If journal is not available online or print request the article from Interlibrary Loan

Know the name of a specific journal and want to know if we get it?

Title begins with

Journal available online. Click the link to the journal. Most programs will allow you to go to the year and then the issue in which your article was published

Library has the Journal in print.

[Lancet \(North American edition\) \(0099-5355\)](#)
to No. 7584 (1969) to present in [Polk Library Collection: click to check print holdings](#)
from 01/05/1991 to 12/24/2006 in [Academic Search Complete](#) and [Health Source: Nursing/Academic Edition](#)
from 1994 to 1996 in [Periodical Abstracts](#)
from 01/01/1995 to 01/25/2003 in [LexisNexis Academic](#)

Books and Book Chapters

- Book and book chapter citations will include a city and publisher at the end of the citation.
- When locating book chapters search for the book it appeared in.
- Use the BadgerCat program to determine where the item is available.
- If the book is available from an UW library, Universal Borrowing can be used to have the item sent in an UW library in your area. (See page 17)
- Books not available through the UW System can be request using Interlibrary Loan. (See page 17)

Book Citation

Freed, M. (1989). *The Educators Desk Reference: A Sourcebook Educational Information and Research*. New York: Macmillan Pub. Co.

Book Chapter Citation

Block, J. S., Weinstein, J., & Steiz, M. (2005). School and parent partnerships in the preschool years. In D. Zeiger (Ed.), *Autism spectrum disorders: Identification, education, and treatment* (3rd ed.). Mahwah, NJ: Lawrence Erlbaum Associates Publishers.

PUTTING IT TOGETHER

LOCATING PRINT AND ONLINE ARTICLES IN POLK LIBRARY

Checking Polk Library's Holdings

Before looking for your articles it is important to make sure the Polk Library receives the periodicals. You can search Polk Library's print and electronic journal holding from the main library page.

The screenshot shows the Polk Library website interface. At the top, there is a navigation bar with the library's name, logo, and contact information. Below this, there are several search and resource sections: 'Find Books', 'Find Articles', and 'Find Videos'. Each section has a search box and a 'GO' button. The 'Find Articles' section also includes a dropdown menu for 'Find articles by subject' and a 'List of Library Search Tools' dropdown. A search result for 'Lancet' is shown, with a callout box highlighting the search criteria: 'Title begins with' and 'Lancet'. The callout box also includes a 'GO' button and a small image of the journal cover.

Available in print at Polk Library

Critical care nursing quarterly (0887-9303)
in Polk Library Collection: click to check print holdings
from 02/01/1998 to present in CINAHL Database with Full Text and ProQuest Nursing Journals
from 02/01/1999 to present in Academic Search Elite and Health Source: Nursing/Academic Edition

Available online. Make sure to select a database that includes the date of your article.

Locating Articles from an Online Source

1. Check the Online Journals A to Z list located on the library's home page to determine if your periodical is available online
2. Select a database. Be sure to select a database that includes the date of your article.
3. Articles can be retrieved using two different methods depending on the database.
 - a. **By Publication**-Articles in databases such as Academic Search, JSTOR, Project Muse or ABI Inform are retrieved by locating the publication and then locating the year and issue of the needed article.
 - b. **By Author/Title**- Articles in a few databases can be retrieved using author's name and a few words from the title. The author's name is usually the more useful since they tend to be more unique.
4. Select an article format.
 - a. **Text/HTML**-Article text formatted into an html page, Usually does not include graphs, charts or images included in the original article. Requires less memory than PDF items.
 - b. **Full Page Image/PDF**-Article present in Portable Document Format. Looks exactly like the original articles, Items require Adobe Acrobat to display and print. Items can require a large amount of memory and can be time consuming to download and print.

Polk Library Collection

The Polk Online Catalog lists of all of the periodicals Polk Library has received and can be searched directly by using the Journal Title Search.

Critical care nursing quarterly.

Database: UW Oshkosh
Location: Periodicals
Call Number: Shelved alphabetically by title
Status: Not Checked Out

Recent Issues are located in the reference room. Issues at the Bindery are also included in this list

Recent Issues: v. 27, no. 3 (2004 July-Sept)

[Critical care medicine Periodicals.](#)
[Intensive care nursing Periodicals.](#)

What is the difference between a Journal and a Magazine?

A journal is a scholarly periodical devoted to disseminating current information about research and developments in a specific field or subfield of human knowledge. Usually published quarterly, most journal articles are longer than five pages and include a bibliography or list of work cited. Journal articles usually include a paragraph at the beginning, called an abstract, which summarizes the main points of the article. Compare with magazine.

A magazine is a popular or general interest periodical containing articles on a variety of topics by different authors. Usually includes color graphics and advertising printed on glossy paper. Articles tend to be short(1-3 pages). Most magazines are issued weekly or monthly. Compare with journal.

What does peer reviewed mean?

A journal for which manuscripts submitted by potential contributors are evaluated by at least one subject specialist in addition to the editor prior to acceptance for publication. Synonymous with refereed.

Helpful Hints

- Periodicals are in a paper format unless otherwise noted.
- Periodicals are arranged in alphabetical order. However, if the first word is *a an* or *the* go to the next word in the title.
- **If you're having problems ask for help at the Reference Desk.**

Locations

Most of the periodical collection is located in three areas of the library. A few periodicals are also located in the EMC on 1st North and Government Documents on 3rd South.

CURRENT PERIODICALS 1st South

Current periodicals includes recent periodicals (current publication year). Recent newspapers (current and previous month) are also located in this room.

BOUND PERIODICALS 2nd South

The library keeps the majority of its older periodicals in large bound volumes. Each of these volumes contains several issues of the periodical, and are shelved in alphabetical order.

MICROFILM 1st North

Back issues of newspapers and some periodicals (those with unusual formats or have high use) are kept in this format. Reader printers are available. Circulation can help you get started.

BINDERY

Periodicals are sent to the bindery before being placed on 2nd South. They are unavailable during this time. Current bindery lists are located with

PUTTING IT TOGETHER

Using Interlibrary Loan (ILL) & Universal Borrowing (UB)

What to know about Interlibrary Loan and Universal borrowing?

- Login into ILL and UB using the 16 digit number at the top of your Titan Card and your last name
- UB allows you to request books and audio visual materials available at other UW system libraries
- Articles from magazines and journals can not be requested using UB
- ILL receives and lends articles or books not available at Polk or from other UW Libraries
- ILL is the only way to request articles not available in print or electronically at Polk Library.
- Notification of materials are sent to your university email

The screenshot shows the Polk Library website interface. Callout boxes provide the following information:

- Track your UB request by logging into Your Record.** (Points to the 'Your Record' link in the 'Related Resources' section.)
- Use WorldCat to find books from any UW Library** (Points to the 'WorldCat' link in the 'Related Resources' section.)
- Interlibrary Loan** (Points to the 'Interlibrary Loan' section, which includes links for 'Request a Book or an Article', 'Request a Renewal of ILL Material', and 'Retrieve Electronic Articles or Review Your Requests').
- Enter your user information below. Press the Logon to ILLiad button to continue.** (Points to the login form, which includes fields for '16-digit Titan Card number' and 'last name', and a 'Logon to ILLiad' button.)

Important Interlibrary Loan Facts

- Interlibrary Loan is also referred to as ILLIAD
- Most ILL article request usually take 3-5 business day. Books may take 1-2 weeks
- Article can be access electronically through your Illiad account, Books can be picked up at Polk Library's circulation desk
- ILL Request can be done directly through the Find It function (articles) or using BadgerCat (books).
- Whole issues of periodicals, videos and sound recordings cannot be requested.
- Reference Librarians can answer general questions concerning ILL. Other questions will be directed to the ILL Department itself. ILL is open Monday -Friday 7:45-4:30 and is closed on the weekends.

Important Universal Borrowing Facts

- Check out most materials for **28** days but they may not be able to be renewed. Videos and curriculum materials circulate for **14** days.
- Pick up and return materials at any UW System campus library.

Checking your Requests

To track the status of your request...

1. Log on to **Your Record** from the Polk Library Catalog menu.
 2. Enter your 16-digit Titan card number.
 3. Locate the section entitled **Request Information**.
- *Materials generally arrive within 1 to 5 days.*
 - *Check your record frequently to determine if your materials are available to be picked up. A notice will also be mailed to you.*
