Vaccines and Medicines

Check the vaccines and medicines list and visit your doctor (ideally, 4-6 weeks) before your trip to get vaccines or medicines you may need.

All travelers
You should be up to date on routine vaccinations while traveling to any destination. Some vaccines may also be required for travel.

Routine vaccines (/travel/diseases/routine/destination/costa-rica)
Make sure you are up-to-date on routine vaccines before every trip. These vaccines include measles-mumps-rubella (MMR) vaccine, diphtheria-tetanus-pertussis vaccine, varicella (chickenpox) vaccine, polio vaccine, and your yearly flu shot.

Most travelers
Get travel vaccines and medicines because there is a risk of these diseases in the country you are visiting.

Hepatitis A (/travel/diseases/hepatitis-a/destination/costa-rica)
CDC recommends this vaccine because you can get hepatitis A through contaminated
### Typhoid

You can get typhoid through contaminated food or water in Costa Rica. CDC recommends this vaccine for most travelers, especially if you are staying with friends or relatives, visiting smaller cities or rural areas, or if you are an adventurous eater.

### Some travelers

Ask your doctor what vaccines and medicines you need based on where you are going, how long you are staying, what you will be doing, and if you are traveling from a country other than the US.

### Hepatitis B

You can get hepatitis B through sexual contact, contaminated needles, and blood products, so CDC recommends this vaccine if you might have sex with a new partner, get a tattoo or piercing, or have any medical procedures.

### Malaria

Although the risk of malaria is low in Costa Rica, you should avoid mosquito bites to prevent malaria. Some travelers to certain areas who are at higher risk for complications from malaria (such as pregnant women) may need to take extra precautions, like antimalarial medicine. Talk to your doctor about how you can prevent malaria while traveling. For more information on malaria in Costa Rica, see malaria in Costa Rica.

### Rabies

Although rabies can be found in bats and other mammals in Costa Rica, it is not found in dogs and is not a major risk to most travelers. CDC recommends rabies vaccine for only these groups:

- Travelers involved in outdoor and other activities in remote areas that put them at risk for bat bites or other animal bites (such as adventure travel and caving).
- People who will be working with or around animals (such as wildlife professionals and researchers).
Yellow Fever (/travel/diseases/yellow-fever/destination/costa-rica)

There is no risk of yellow fever in Costa Rica. The government of Costa Rica requires proof of yellow fever vaccination only if you are arriving from a country with risk of yellow fever. This does not include the US. If you are traveling from a country other than the US, check this list to see if you may be required to get the yellow fever vaccine: Countries with risk of yellow fever virus (YFV) transmission (/travel/yellowbook/2012/chapter-3-infectious-diseases-related-to-travel/yellow-fever.htm#1948).

For more information on recommendations and requirements, see yellow fever recommendations and requirements for Costa Rica (/travel/yellowbook/2012/chapter-3-infectious-diseases-related-to-travel/yellow-fever-and-malaria-information-by-country/costa-rica.htm#5441). Your doctor can help you decide if this vaccine is right for you based on your travel plans.

Key

- Get vaccinated
- Eat and drink safely
- Keep away from animals
- Avoid sharing body fluids
- Take antimalarial meds
- Prevent bug bites
- Reduce your exposure to germs
- Avoid non-sterile medical or cosmetic equipment

Stay Healthy and Safe

Learn actions you can take to stay healthy and safe on your trip. Vaccines cannot protect you from many diseases in Costa Rica, so your behaviors are important.

Eat and drink safely

Unclean food and water can cause travelers’ diarrhea and other diseases. Reduce your risk by sticking to safe food and water habits.

Eat

- Food that is cooked and served hot
- Hard-cooked eggs
- Fruits and vegetables you have washed in clean water or peeled yourself
- Pasteurized dairy products
Don’t Eat

- Food served at room temperature
- Food from street vendors
- Raw or soft-cooked (runny) eggs
- Raw or undercooked (rare) meat or fish
- Unwashed or unpeeled raw fruits and vegetables
- Unpasteurized dairy products
- “Bushmeat” (monkeys, bats, or other wild game)

Drink

- Bottled water that is sealed
- Water that has been disinfected
- Ice made with bottled or disinfected water
- Carbonated drinks
- Hot coffee or tea
- Pasteurized milk

Don’t Drink

- Tap or well water
- Ice made with tap or well water
- Drinks made with tap or well water (such as reconstituted juice)
- Unpasteurized milk

Take Medicine

Talk with your doctor about taking prescription or over-the-counter drugs with you on your trip in case you get sick.

Prevent bug bites

Bugs (like mosquitoes, ticks, and fleas) can spread a number of diseases in Costa Rica. Many of these diseases cannot be prevented with a vaccine or medicine. You can reduce your risk by taking steps to prevent bug bites.

What can I do to prevent bug bites?

- Cover exposed skin by wearing long-sleeved shirts, long pants, and hats.
- Use an appropriate insect repellent (see below).
- Use permethrin-treated clothing and gear (such as boots, pants, socks, and tents). Do not use permethrin directly on skin.
- Stay and sleep in air-conditioned or screened rooms.
- Use a bed net if the area where you are sleeping is exposed to the outdoors.

What type of insect repellent should I use?

- **FOR PROTECTION AGAINST TICKS AND MOSQUITOES:** Use a repellent that contains 20% or more DEET for protection that lasts up to several hours.
- **FOR PROTECTION AGAINST MOSQUITOES ONLY:** Products with one of the following active ingredients can also help prevent mosquito bites. Higher percentages of active ingredient provide longer protection.
  - DEET (http://www.epa.gov/pesticides/factsheets/chemicals/deet.htm)
What should I do if I am bitten by bugs?

- Avoid scratching bug bites, and apply hydrocortisone cream or calamine lotion to reduce the itching.
- Check your entire body for ticks after outdoor activity. Be sure to remove ticks properly.

What can I do to avoid bed bugs?
Although bed bugs do not carry disease, they are an annoyance. See our information page about avoiding bug bites for some easy tips to avoid them. For more information on bed bugs, see Bed Bugs.

For more detailed information on avoiding bug bites, see Avoid Bug Bites.

Stay safe outdoors

Keep away from animals

Reduce your exposure to germs

Follow these tips to avoid getting sick or spreading illness to others while traveling:

- Wash your hands often, especially before eating.
- If soap and water aren’t available, clean hands with hand sanitizer (containing at least 60% alcohol).
- Don’t touch your eyes, nose, or mouth. If you need to touch your face, make sure your hands are clean.
- Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing.
- Try to avoid contact with people who are sick.
- If you are sick, stay home or in your hotel room, unless you need medical care.

Avoid sharing body fluids

Diseases such as HIV infection can be spread through body fluids, such as saliva, blood, vomit, and semen.

Protect yourself:

- Use latex condoms correctly.
- Do not inject drugs.
Limit alcohol consumption. People take more risks when intoxicated.
Do not share needles or any devices that can break the skin. That includes needles for tattoos, piercings, and acupuncture.
If you receive medical or dental care, make sure the equipment is disinfected or sanitized.

Know how to get medical care while traveling

Select safe transportation

Motor vehicle crashes are the #1 killer of healthy US citizens in foreign countries.
In many places cars, buses, large trucks, rickshaws, bikes, people on foot, and even animals share the same lanes of traffic, increasing the risk for crashes.

Walking
Be smart when you are traveling on foot.
- Use sidewalks and marked crosswalks.
- Pay attention to the traffic around you, especially in crowded areas.
- Remember, people on foot do not always have the right of way in other countries.

Riding/Driving
Choose a safe vehicle.
- Choose official taxis or public transportation, such as trains and buses.
- Ride only in cars that have seatbelts.
- Avoid overcrowded, overloaded, top-heavy buses and minivans.
- Avoid riding on motorcycles or motorbikes, especially motorbike taxis. (Many crashes are caused by inexperienced motorbike drivers.)
- Choose newer vehicles—they may have more safety features, such as airbags, and be more reliable.
- Choose larger vehicles, which may provide more protection in crashes.

Think about the driver.
- Do not drive after drinking alcohol or ride with someone who has been drinking.
- Consider hiring a licensed, trained driver familiar with the area.
- Arrange payment before departing.

Follow basic safety tips.
- Wear a seatbelt at all times.
- Sit in the back seat of cars and taxis.
- When on motorbikes or bicycles, always wear a helmet. (Bring a helmet from home, if needed.)
- Avoid driving at night; street lighting in certain parts of Costa Rica may be poor.
- Do not use a cell phone or text while driving (illegal in many countries).
- Travel during daylight hours only, especially in rural areas.
- If you choose to drive a vehicle in Costa Rica, learn the local traffic laws and have the proper paperwork.
• Get any driving permits and insurance you may need. Get an International Driving Permit (IDP). Carry the IDP and a US-issued driver's license at all times.
• Check with your auto insurance policy’s international coverage, and get more coverage if needed. Make sure you have liability insurance.

Flying
• Avoid using local, unscheduled aircraft.
• If possible, fly on larger planes (more than 30 seats); larger airplanes are more likely to have regular safety inspections.
• Try to schedule flights during daylight hours and in good weather.

Medical Evacuation Insurance
If you are seriously injured, emergency care may not be available or may not meet US standards. Trauma care centers are uncommon outside urban areas. Having medical evacuation insurance (http://travel.state.gov/travel/cis_pa_tw/cis/cis_1470.html) can be helpful for these reasons.

Helpful Resources

The Association for International Road Travel (http://www.asirt.org) (http://www.cdc.gov/Other/disclaimer.html) has country-specific Road Travel Reports (http://www.asirt.org/KnowBeforeYouGo/CountryRoadTravelReports/tabid/171/Default.aspx) (http://www.cdc.gov/Other/disclaimer.html) available for most countries for a minimal fee.

Information for study abroad and other extended stays
Crashes involving in-country travel are a major cause of injury to people studying abroad, so find and use safe modes of travel. (See advice above.)

If you are considering buying a bicycle, vehicle, or motorbike during your stay, make sure you have the appropriate permits and insurance.

Maintain personal security

Use the same common sense traveling overseas that you would at home, and always stay alert and aware of your surroundings.

Before you leave
• Research your destination(s), including local laws, customs, and culture.
• Enroll in the Smart Traveler Enrollment Program (STEP)
• Leave a copy of your itinerary, contact information, credit cards, and passport with someone at home.
• Pack as light as possible, and leave at home any item you could not replace.

While at your destination(s)
• Carry contact information for the nearest US embassy or consulate (http://www.usembassy.gov/).
• Carry a photocopy of your passport and entry stamp; leave the actual passport securely in your hotel.
• Follow all local laws and social customs.
• Do not wear expensive clothing or jewelry.
• Always keep hotel doors locked, and store valuables in secure areas.
• If possible, choose hotel rooms between the 2nd and 6th floors.

Information for study abroad and other extended stays
To be sure that you are able to fully enjoy your time abroad, pay attention to your safety. Check out the Students Abroad website (http://studentsabroad.state.gov/index.php) from the US Department of State for tips on staying safe during your study abroad experience.

Healthy Travel Packing List

Pack items for your health and safety.

• You may not be able to purchase and pack all of these items, and some may not be relevant to you and your travel plans. Talk to your doctor about which items are most important for you.
• This list is general and may not include all the items you need. Check our Traveler Information Center (/travel/page/traveler-information-center) for more information if you are a traveler with specific health needs, such as travelers who are pregnant, immune compromised, or traveling for a specific purpose like humanitarian aid work.
• Remember to pack extras of important health supplies in case of travel delays.

Prescription medicines

• Your prescriptions
• Travelers' diarrhea (http://wwwnc.cdc.gov/travel/page/travelers-diarrhea) antibiotic
• Suture/syringe kit
  Kit is for use by local health care provider & requires a letter from your doctor on letterhead stationery
• Altitude sickness medicine
• Medicine to prevent malaria

Medical supplies

• Glasses
  Consider packing spare glasses in case yours are damaged
• Contacts
  Consider packing spare contacts in case yours are damaged
• Needles or syringes, e.g. for diabetes
  Requires a letter from your doctor on letterhead stationery
- Diabetes testing supplies
- Insulin
- Inhalers
- Epinephrine auto-injectors (EpiPens)
- Medical alert bracelet or necklace

**Over-the-counter medicines**

- Antacid
  - Examples: loperamide [Imodium] or bismuth subsalicylate [Pepto-Bismol]
- Antihistamine
- Motion sickness medicine
- Cough drops
- Cough suppression/expectorant
- Decongestant
- Medicine for pain and fever
  - Examples: acetaminophen, aspirin, or ibuprofen
- Mild laxative
- Mild sedative or other sleep aid
- Saline nose spray

**Supplies to prevent illness or injury**

- Hand sanitizer or wipes
  - Alcohol-based hand sanitizer containing at least 60% alcohol or antibacterial hand wipes
- Water purification tablets
- Water purification tablets
  - May be needed if camping or visiting remote areas
- Insect repellent
  - Select an insect repellent based on CDC recommendations: [Avoid Bug Bites](http://wwwnc.cdc.gov/travel/page/avoid-bug-bites)
- Permethrin
  - Permethrin is insect repellent for clothing. It may be needed if you spend a lot of time outdoors. Clothing can also be treated at home in advance.
- Bed net
  - For protection against insect bites while sleeping
- Sunscreen
  - (SPF 15 or greater) with UVA and UVB protection. See [Sun Exposure](http://wwwnc.cdc.gov/travel/page/sun-exposure).
- Sunglasses and hat
  - Wear for additional sun protection. A wide brim hat is preferred.
- Personal safety equipment
  - Examples: child safety seats, bicycle helmets
- Earplugs
- Latex condoms

**First-aid kit**

- 1% hydrocortisone cream
- Antifungal ointments
- Antibacterial ointments
- Antiseptic wound cleanser
- Aloe gel
For sunburns
- **Insect bite treatment**
  Anti-itch gel or cream
- **Bandages**
  Multiple sizes, gauze, and adhesive tape
- **Moleskin or molefoam for blisters**
- **Elastic/compression bandage wrap**
  For sprains and strains
- **Disposable gloves**
- **Digital thermometer**
- **Scissors and safety pins**
- **Cotton swabs (Q-Tips)**
- **Tweezers**
- **Eye drops**
- **Oral rehydration salts**

**Documents**
- **Health insurance documents**
  Health insurance card (your regular plan and/or supplemental travel health insurance plan) and copies of claim forms
- **Proof of yellow fever vaccination**
  If required for your trip, take your completed International Certificate of Vaccination or Prophylaxis card or medical waiver
- **Copies of all prescriptions**
  Make sure prescriptions include generic names. Bring prescriptions for medicines, eye glasses/contacts, and other medical supplies.
- **Contact card**
  Carry a contact card containing the street addresses, phone numbers, and e-mail addresses of the following:
  - Family member or close contact remaining in the United States
  - Health care provider(s) at home
  - Lodging at your destination
  - Hospitals or clinics (including emergency services) in your destination
  - U.S. embassy or consulate in the destination country or countries

**Travel Health Notices**

There are no notices currently in effect for Costa Rica.

**After Your Trip**

If you are not feeling well after your trip, you may need to see a doctor. If you need help finding a travel medicine specialist, see [Find a Clinic](http://wwwnc.cdc.gov/travel/page/find-clinic). Be sure to tell your doctor about your travel, including where you went and what you did on your trip. Also tell your doctor if you were bitten or scratched by an animal while traveling.

If your doctor prescribed antimalarial medicine for your trip, keep taking the rest of your pills after you return home. If you stop taking your medicine too soon, you could still get sick.

**Malaria is always a serious disease and may be a deadly illness.** If you become ill with a fever either while traveling in a malaria-risk area or after you return home (for up to 1 year), you should seek **immediate** medical attention and should tell the doctor about your travel history.
For more information on what to do if you are sick after your trip, see Getting Sick after Travel (/travel/page/getting-sick-after-travel).
