

Homestay Preferences

Family Name: _____ First Name: _____

Do you have any allergies? YES NO

If yes, what are you allergic to (include food & pet allergies)?

Do you have a condition which would make it difficult to walk distances? YES NO

Students will be scattered around the city. Some will be farther from the university than others. If you have difficulty walking, please write the maximum number of minutes you can walk, one way, from your host family's home to the university.

_____ minutes each way

Are you a vegetarian? YES NO

If yes, elaborate.

Do you have a strong aversion to smoke? YES NO

Please only answer "yes" to this question if you cannot live with smoke. Smoking is much more socially-acceptable in Spain than it is in the U.S., and finding non-smoking families for a large number of students may be difficult.

Is there anything else your host family should know about you (medical conditions already disclosed on your study abroad application will be shared with host families and school administrators in Salamanca)? YES NO

I understand that program administrators will not be able to find a host family which matches **all** of my expectations. I understand that program administrators will need to weigh **all** of the applicants' preferences, including those on non-UW Oshkosh students studying through the same program, in order to make the best possible match for **all** of the applicants. I understand that if I have chosen a roommate, placement according to my preferences as listed above will supercede my roommate preference.
