## PPST Mathematics Test

### General Information:

- 60 minutes long
- 40 questions
  - o Arithmetic
  - o Elementary Algebra
  - o Basic Geometry
  - o Measurement
  - o Graph/Chart Reading

### Test Taking Suggestions:

1. Do the quick and easy questions FIRST.
2. Don't leave any questions blank—there is no penalty for guessing!!
3. Make sure your answer corresponds to the correct choice and number.
4. Mark key words.
5. Pull out key information.
6. Plug in numbers.
7. Work backwards from the choices/answers given.
8. Approximate and/or estimate your answers, making sure you choose a

*unreasonable choices.*

9. Make comparisons.
10. Mark up and draw diagrams.
11. Interpret special symbols.
12. Try possibilities in probability problems.
13. Determine the method (the “how”) in procedure problems.
14. Interpret data.
15. Work the problem out as simply and quickly as possible.
