

## Prototypes for School of Nursing and Health Sciences

### Prototype 1 Option created based on feedback from stakeholders meeting

- **One Associate Dean** overseeing the school.
- **2 Area Directors:**
  1. Undergraduate Programming
  2. Graduate Programming

#### Expected Efficiencies:

- Flexibility in allocating resources based on program demands.
- Streamlined leadership allows for shared decision-making and program alignment.
- Clear delineation of undergraduate and graduate roles.
- Focused management by dedicated directors enhances programmatic oversight.

#### Cost Savings:

- Cross-area leadership roles reduce administrative overhead and improves resource allocation.
- Streamlined reporting and operational structures prevent redundancy.
- Increased flexibility in staffing and program support reduces duplication.

### Prototype 2 Developed during stakeholder meeting

- **One Associate Dean** overseeing the school.
- **4 Areas**
  1. Undergrad Nursing
  2. Undergrad Health Professions
  3. Graduate Nursing and Health Professions
  4. Pre-Nursing and Pre-Health Professions

#### Expected Efficiencies:

- Reduces the number of leadership positions, cutting administrative costs.
- Efficiency gains from pooling shared resources for student success initiatives.

#### Potential Cost Savings:

- Reduced need for multiple support teams
- Streamlined curriculum management through coordinated leadership of both undergraduate and graduate programs.
