Agreement for an Intercollegiate Dual Degree Program 
Between University of Wisconsin-Madison College of 
Engineering and University of Wisconsin Oshkosh 

This document states the terms of an agreement between the College of Engineering, University of Wisconsin-Madison (CoE) and the University of Wisconsin Oshkosh.

Beginning with the Fall semester of the 2018-2019 Academic Year, a dual degree program leading to a baccalaureate BS degree in physics from the University of Wisconsin Oshkosh and a BS degree in a branch of engineering from CoE will be available to eligible students. This dual degree program will require approximately three years of attendance at the University of Wisconsin Oshkosh followed by approximately two years of attendance at the CoE.

Eligible dual degree candidates include Wisconsin residents who first enrolled at the University of Wisconsin Oshkosh as freshmen. Eligible dual degree candidates do not include students who entered the University of Wisconsin Oshkosh as transfer students or those who have since transferred from the University of Wisconsin Oshkosh to another institution.

Eligible dual degree candidates will be exempt from the 80 credit limit, which states that students who have earned more than 80 semesters credits at the time of application are not eligible to apply for transfer admission to the CoE. The College of Engineering's undergraduate programs do not accept second degree candidates under any circumstances, so dual degree candidates are not eligible to pursue an undergraduate degree in the CoE after completing all degree requirements at any other institution.

Eligible students who express interest in the dual degree program may apply for entrance into the CoE portion of the program a maximum of two times. Dual degree candidates must meet UW-Madison’s minimum requirements for admission consideration, including successful completion of two units of a single foreign language; complete Communication Part A; and earn direct equivalents to meet current General College Requirements and College of Engineering degree requirements: MATH 221-222, CHEM 103-104 or CHEM 109, PHYSICS 201/207 or EMA 201. At the University of Wisconsin Oshkosh, students must meet or exceed the Core GPA (comprised of physics, mathematics, computer science, and chemistry coursework required by the CoE program) and Overall GPA Benchmarks for Progression that are effective at the time of their application, as listed on the College of Engineering website.

Further, University of Wisconsin Oshkosh dual degree students must meet requirements given in the University of Wisconsin Oshkosh Bulletin for the Physics-Engineering Dual Degree Emphasis. The application requires the positive recommendation of the Chair of the Department of Physics and Astronomy at the University of Wisconsin Oshkosh, or designee, attesting to their ability to finish the program at CoE.

Admission to the CoE is very competitive and selective, especially to engineering programs with high student demand and limited capacity. Admission to the CoE is not guaranteed. Qualified dual degree applicants will be considered for admission to their intended engineering program by the UW-Madison Office of Admissions and Recruitment in a comprehensive and holistic review process. Dual degree
candidates who are not selected for admission to their first choice major in the CoE will not be offered a second choice option in the CoE. The Office of Admissions may consider these students for admission to the second choice major outside of the College of Engineering that they had indicated on their application for transfer admission to UW-Madison. However, accepting admission to a major outside of the CoE will void the dual degree agreement.

In the initial years of work taken at the University of Wisconsin Oshkosh, students must complete appropriate courses in chemistry, computer science, mathematics, and physics for the intended degrees at both schools. University of Wisconsin Oshkosh requirements for the dual degree are given in the University of Wisconsin Oshkosh Bulletin for the Physics-Engineering Dual Degree Emphasis. Students must complete a minimum of 80 semester credits, major requirements, and courses that count towards the University of Wisconsin Oshkosh general education requirements. Students will be advised of UW-Madison’s liberal studies requirements as they choose general education courses at the University of Wisconsin Oshkosh. Credit, but not grades, for these courses passed with a grade of C or better, will be transferred to the UW-Madison transcript as credit for appropriate courses, even though they may not be required by the CoE engineering curriculum selected by the student.

During the years spent at CoE, students will complete the requirements specified by the curriculum effective at the time of their admission to their engineering degree program. The CoE automatically graduates students when they finish degree requirements. Upper-level physics/engineering coursework completed at CoE will be transferred to the University of Wisconsin Oshkosh to complete the requirements for the University of Wisconsin Oshkosh degree in physics, and the University of Wisconsin Oshkosh will waive the 15 credit senior residency rule.

Changes in curricula, at both institutions, will be addressed as they occur. Students will be eligible to participate in commencement ceremonies at both the University of Wisconsin-Madison and the University of Wisconsin Oshkosh. Students must graduate from both institutions concurrently. It is their responsibility to notify the Registrar of the University of Wisconsin Oshkosh of their intent to graduate and to supply them with an official copy of their UW-Madison transcript.

Students are subject to the UW System Excess Credit Policy. This would likely be assessed by UW-Madison, as the students will most likely be attending UW-Madison at the time excess credits are taken, if applicable.

When transferring to UW-Madison from the University of Wisconsin Oshkosh, the student will be expected to follow standard UW-Madison procedures to submit applications for admission, housing, and financial aid. These applications and materials must be submitted in accordance with published deadlines.

Recruitment of students for this program will be the responsibility of the University of Wisconsin Oshkosh, with the cooperation of the CoE.

This agreement constitutes a declaration of intent and is subject to renegotiation as conditions change and experience dictates. The dual degree agreement will be automatically deactivated if no students transfer from the University of Wisconsin Oshkosh to the UW-Madison College of Engineering within 10 years.
