

UNIVERSITY OF WISCONSIN OSHKOSH
 MEDICAL TECHNOLOGY PROGRAM
Biology 344 INTRODUCTION TO HEMATOLOGY
Section 001 – Spring 2014

INSTRUCTOR:	John E. Strous, MS, MLS(ASCP) Director, Medical Technology Program	CLASS:	Medical Technology Lab HS 28
OFFICE:	Halsey Science Center - Room 127	TIME:	Lecture: M 11:30--12:30 HS 28 F 10:20--12:30 HS 28 Lab: W 11:30--1:40 HS 28
OFFICE HOURS:	Many times available, by appointment	CREDITS:	3
PHONE:	424-1487		

TEXTS: The Morphology of Human Blood Cells, 6th edition, Diggs, L.W., Sturm, D., and A. Bell. Abbott Laboratories, Abbott Park, IL., 1985. [Handout]

Clinical Hematology and Fundamentals of Hemostasis, 5th edition, D.M. Harmening. F.A. Davis Company, Philadelphia, 2009. [Recommended]

Medical Technology Program Student Achievement Goals:

- 1) Graduates of the Medical Technology Program will demonstrate a broad foundation in basic chemistry, biology and microbiology.
- 2) Medical Technology graduates will demonstrate the theoretical knowledge and technical skills necessary to effectively function in the following major disciplines of Medical Technology: Clinical Chemistry, Hematology, Immunohematology (Blood Banking), Immunology and Microbiology. In each of these disciplines our students will be able to perform the relevant routine clinical laboratory tests according to the procedures in place at their internship site. Moreover, they will evaluate normal and abnormal controls and demonstrate proficiency with the instrumentation in use at their clinical site.
- 3) Our Medical Technology graduates will be able to anticipate and correlate expected results within the disciplines of Medical Technology to provide identification and confirmation of disease processes.
- 4) Medical Technology graduates will critically evaluate new analytical procedures and new instrumentation in order to keep pace with developing technologies.
- 5) Medical Technology graduates will be conscientious professionals in the clinical laboratory setting who can communicate with their peers, doctors and patients. They will function effectively as members of the health care system.

Course Objectives

Each student will be given laboratory exercises and objectives prior to the scheduled exercise.

Grading Policy

	No.	Points	Total Points
Examinations	3	100 each	300 points
Practical Evaluation:			
Complete Blood count with			A = 450 points or above
Blood Indices & Differential			B+ = 440-450 points
Automated	50	50	B = 410-440 points
Manual	50	50	B- = 410-400 points
Differentials			C = 350-400 points
Making			D = 300-350 points
Staining			F = below 300 points
Counting		100	

*Attendance is mandatory, habitual tardiness is not acceptable; - 3% of point total for each unexcused absence.

Laboratory Safety and Professionalism	Minus 0-100	<u>Minus 0-100</u>
	MAXIMUM TOTAL	500

Biology 344 INTRODUCTION TO HEMATOLOGY

WEEK OF:	LECTURE DAY	LECTURE TOPIC	READING ASSIGNMENT
(1) Feb. 3	1 2	General Instructions Hemostasis	Chapter 24
(2) Feb. 10	3 4	Hemostasis Bleeding Disorders	Chapter 24 Chapters 25, 26, 27
(3) Feb. 17	5 6	Bleeding Disorders Principles of Staining	Chapters 25, 26, 27 To be assigned
(4) Feb. 24	7 8	The Organelles of the Cell The Organelles of the Cell	To be assigned
(5) March 3	9 10	Hematopoiesis Hematopoiesis	Harmening Chapter 1
(6) March 10	11 12	Examination I Differentiation and Development	
(7) March 17	13 14	Differentiation and Development Differentiation of Granulocytes	Chapter 1
March 24		SPRING BREAK!	Have Fun!!!
(8) March 31	15 16	Differentiation of Lymphocytes Differentiation of Monocytes	Chapter 1
(9) April 7	17 18	Erythrocytes: Development Erythrocytes: Structure and Function	Chapter 1 (p. 11-14) Chapter 3
(10) April 14	19 20	Production of Hemoglobin Production of Hemoglobin	Chapter 3 Chapter 3
April 20	Easter		
(11) April 21	21 22	Examination Erythrocyte Disorders	Chapter 4
(12) April 28	23 24	Erythrocyte Disorders Erythrocyte Disorders	Chapter 6 Chapter 7
(13) May 5	25 26	Erythrocyte Disorders Leukocyte Disorders	Chapter 9 Chapter 15
(14) May 12	27 28	Leukocyte Disorders Final Examination	Chapters 16,17,19,20

*NOTE: This schedule will be modified after a review of the Medical Bacteriology (Biology 312/313) and Introduction to Instrumental Analysis (Chem 320) semester schedules. (also Junior Medical Technology major Spring courses.) Changes will be made to minimize examination conflicts and will be announced in class.

Biology 344 INTRODUCTION TO HEMATOLOGY

WEEK	LABORATORY	READING ASSIGNMENT
1	OSHA Regulations	
2	Bleeding Time Clot Retraction Whole Blood Clotting Time Prothrombin Time Partial Thromboplastin Time	Diggs Harmening (852-853) Handout Harmening (856-857)
3	Preparation and Staining of Differential Smears	Harmening (768-770)
4	Examination of Normal Differentials	Diggs Harmening (770-771)
5	Differential Counting	Handout Diggs
6	General Phlebotomy Unknown Differentials	Diggs
7	Examination of Abnormal Differentials	Diggs
SPRING BREAK!		
8	Hematocrit and Hemoglobin	Hemoglobin Handout Harmening (771-772)
9	Erythrocyte and Leukocyte Count	Harmening (765-768)
10	Erythrocyte and Leukocyte Count	Harmening (765-768)
11	Reticulocyte Count Blood Indices Examination of Slides	Harmening (772-775) Diggs
12	Platelet Count Examination of Slides	Harmening (767-768) Diggs
13	Examination (Laboratory) CBC with Differential, Automated	
14	Examination (Laboratory) CBC without Differential, Manual	

***This schedule will be modified - see note on previous page.**

NOTIFICATIONS:

DISABILITY SERVICES

The University of Wisconsin Oshkosh is committed to providing reasonable accommodation for students with disabilities. Please contact the Disability Services [Dean of Students Office, 125 Dempsey Hall, 424-3100 (Voice), 424-1319 (TTY)] for the University's accommodation request form or visit their website at <http://www.uwosh.edu/dean/disabilities.htm>. Information related to an individual's accommodation request or other arrangements will be confidential and will be shared with relevant University personnel or offices on a "need to know" basis.

ELECTRONIC DEVICES

The use of electronic devices (computers, cell phones, recorders, etc) during class, lab exercises, or exams must be individually approved by the course instructor.

ATTENDANCE

Attendance is required – if a student must miss class they must obtain permission/provide notification prior to that class. Unexcused absence will result in loss of 3% of a students total points.
