

ENVIRONMENTAL STUDIES

Sustainability • Ecosystem management • Environmental policy

An Environmental Studies major offers a broad, interdisciplinary education that integrates the natural sciences, social sciences and humanities to explore and address complex environmental challenges. The program emphasizes real-world engagement and equips students to understand environmental issues from scientific, political, economic, ethical and cultural perspectives.

MAJOR FACTS

- Two emphasis options: Environmental Policy and Values and Environmental Science
- Sustainability certificates: Sustainability & Social Change, Sustainability Communication, Sustainability & Renewable Energy, Sustainability Leadership in Organizations and Sustainability Education
