

SUPPLY CHAIN MANAGEMENT

Logistics coordination • Procurement systems • Operations strategy

Supply chain management (SCM) strategically coordinates all activities from sourcing to delivery, and careers in this field optimize these processes through various functions like procurement and logistics. Professionals in SCM use data-driven decisions in areas such as sourcing and transportation to ensure efficient and competitive business operations.

MAJOR FACTS

- One of the highest starting salaries for UWO business grads
- Many internships and jobs available in Northeast Wisconsin's strong manufacturing and distribution sector
- Logistician jobs are projected to grow 19% (2023-2033)

EXPERIENTIAL LEARNING

Students gain practical experience through case studies, industry projects, internships with Northeast Wisconsin companies and simulations. Collaborations with local businesses, plant tours, competitions and networking events further enhance their theoretical knowledge with real-world application in logistics, procurement and operations.
