Comoros	Iraq	Nauru	Solomon Islands	Zimbabwe
Congo	Kazakhstan	Nepal	Somalia	

Source: World Health Organization Global Health Observatory, Tuberculosis Incidence 2012. Countries with incidence rates of ≥ 20 cases per 100,000 population. For future updates, refer to <http://apps.who.int/ghodata>.

Have you had frequent or prolonged visits* to one or more of the countries listed above with a high prevalence of TB disease? (If yes, CHECK the countries, above)	<input type="checkbox"/>	Yes	<input type="checkbox"/>	No
Have you been a resident and/or employee of high-risk congregate settings (e.g., correctional facilities, long-term care facilities, and homeless shelters)?	<input type="checkbox"/>	Yes	<input type="checkbox"/>	No
Have you been a volunteer or health-care worker who served clients who are at increased risk for active TB disease?	<input type="checkbox"/>	Yes	<input type="checkbox"/>	No
Have you ever been a member of any of the following groups that may have an increased incidence of latent <i>M. tuberculosis</i> infection or active TB disease – medically underserved, low-income, or abusing drugs or alcohol?	<input type="checkbox"/>	Yes	<input type="checkbox"/>	No

If the answer is YES to any of the above questions, the University of Wisconsin Oshkosh requires that you receive TB testing by Interferon-gamma release assay (IGRA) as soon as possible but at least **prior** to the start of the subsequent semester.

If the answer to all of the above questions is NO, no further testing or further action is required.

* The significance of the travel exposure should be discussed with a health care provider and evaluated.
